

STOCK RECOMMENDATION - JANUARY 23RD, 2023

MARKET REVIEW

For the week ended January 20th, 2023.

- The local bourse ended the week positive as the All-Share Index advanced by 0.16% WoW to settle at 52,594.68pts. Consequently, the Year-to-Date return edged higher to 2.62% (vs. 2.46% in the prior week).
- Across sectors, performance was mixed as **NGXBNK** (-2.60% WoW), **NGXCNSMRGDS** (-0.40% WoW) and **NGXINDUSTR** (-1.06% WoW) recorded week-on-week losses, while **NGXOILGAS** (+0.35% WoW) and **NGXINS** (+1.78% WoW) closed positive.
- INTENEGINS** led the gainers' chart (+28.95% WoW), while **LIVESTOCK** (-13.85% WoW) was the week's top loser. **VERITASKAP** and **GEREGU** ended the week as the most traded stocks by volume and value, respectively.

MARKET *P* REVIEW

For the week commencing January 23rd, 2023.

- While there are competing arguments for both sides of a positive and negative market outing this week, the latter seems to be more likely. For one, there is a likelihood of another hike (100bps in our view) in the Monetary Policy Rate at the Monetary Policy Committee meeting this week. In line with that and the higher amount on offer vis-à-vis the previous auctions, we think that yield would rise at the upcoming Treasury Bills Primary Market Auction which could make the equities market less attractive.
- Additionally, technical indicators, including the Relative Share Index (RSI) point and Price Action, point to a bearish market.
- Thus, we expect the market to close in the negative region this week.**

Investment Ratings

Fair Value Estimate

We estimate stock's fair value by computing a weighted average of projected prices derived from discounted cash flow and relative valuation methodologies. The choice of relative valuation methodology (ies) usually depends on the firm's peculiar business model and what in the opinion of our analyst is considered as a key driver of the stock's value from a firm specific as well as an industry perspective. However, we attach the most weight to discounted cash flow valuation methodology.

Target Price Estimate

While we believe that the fair value is underpinned by the future benefits stream and growth outlooks, which are primary drivers of value, the market might not align to the fair value estimate within the estimated investment horizon. Thus, we do not derive our target price from the fair value but from a trading perspective using the year projected earnings or book value and the respective target multiples. Notwithstanding, we are of the opinion that the variance between the two should not be too significant.

Ratings Specification

BUY: Target Price of the stock is above the current market price by at least **10 percent**

HOLD: Target Price of the stock ranges between **-10 percent and 10 percent** from the current market price.

SELL: Target Price of the stock is more than **10 percent** below the current market price.

Definitions

Price Targets: Price targets reflect in part the analyst's estimates for the company's earnings. The achievement of any price target may be impeded by general market and macroeconomic trends, and by other risks related to the company or market and may not occur if the company's earnings fall short of estimates.

Asset allocation: The recommended weighting for equities, cash and fixed income instrument is based on a number of metrics and does not relate to a particular size change in one variable.

Conflict of Interest

It is the policy of Meristem Securities Limited and its subsidiaries and affiliates (Individually and collectively referred to as "Meristem") that research analysts may not be involved in activities that suggest that they are representing the interests of Meristem in a way likely to appear to be inconsistent with providing independent investment research. In addition, research analysts' reporting lines are structured so as to avoid any conflict of interests.

For example, research analysts are not subject to the supervision or control of anyone in Meristem's Investment Banking or Sales and trading departments. However, such sales and trading departments may trade, as principal, on the basis of the research analysts' published research. Therefore, the proprietary interests of those Sales and Trading departments may conflict with your interests.
